Sanitary Sewer Improvements Planned for Huntersville Neighborhood Work set to begin in early 2015

Dear Valued Customer,

The City of Norfolk Department of Utilities is pleased to have scheduled a \$3,500,000 infrastructure improvement project in your neighborhood. The project (shown on the map to the right) will include new sanitary sewer and water pipes, a new wastewater pump station, and fully resurfaced streets.

The pipes and pump station will be installed by two different contractors: Kevcor Contracting will install the water and sewer pipes; and TA Sheets Mechanical will construct the sewer pump station. The work is scheduled to begin in early 2015 and be completed in the spring of 2016. Prior to construction you may notice utility markings and survey work in the neighborhood.

The City and our contractors will do our best to minimize the unavoidable disruptions associated with the construction. If you have any questions or concerns regarding this project, please do not hesitate to contact the City's on-site construction inspector, Sean Simmons. He can be reached by cell phone at 374-0126 to respond quickly. You may also contact the Project Manager, Chad Edralin, P.E. at 664-6736.

The Department of Utilities looks forward to completing this project which will enhance your water and sewer services for many years to come.

Sincerely,

A handwritten signature in black ink that reads "Kristen M. Lentz".

Kristen M. Lentz, P.E.
Norfolk Director of Utilities
